SHREYA ANEKAR

(858) 241-7900 | shreyaanekar27@gmail.com | https://www.linkedin.com/in/sanekar27 | San Jose, CA

EDUCATION

M.S. in Business Analytics, University of California, San Diego, CA Dec 2026
Relevant Coursework: Scalable Analytics (Spark, AWS, Data Warehousing), GenAI for Business (Agentic AI, RAG, LLM's), Business Intelligence (Tableau), Analytics & Statistical Modeling (Correlation Analysis, A/B Testing, Cohort Analysis)

B.Tech. in Information Technology, MKSSS's Cummins College of Engineering for Women, Pune Jun 2021

SKILLS & COMPETENCIES

Technical Skills: Python, SQL (T-SQL, PostgreSQL, SparkSQL), PySpark, Trino, Airflow, dbt, Tableau, Power BI, Excel, Git
Cloud & Analytics: Databricks, Snowflake, AWS (S3, Redshift), Iceberg, SSIS, ETL/ELT, Data Modeling, Docker, CI/CD
ML & Forecasting: Anomaly Detection, Hypothesis Testing, Linear/Logistic Regression, Chi-squared, t-test
AI & Automation: RAG, Agentic Workflows, Vector Databases, Human-in-the-loop systems

PROFESSIONAL EXPERIENCE

Tesla, Inc | *Data Engineer Intern* | *Palo Alto, USA* Jun 2026 - Sep 2026

- **Built PySpark and SQL pipelines on Airflow processing ~1 trillion daily telemetry signals** into session-level KPIs, establishing initial metrics framework and creating 3 Tableau dashboards to track feature adoption, savings, and solar usage
- **Increased user coverage by ~90x by extending PySpark session logic** and unifying Airflow pipelines, eliminating redundant scans of batch tables and reducing compute cost by ~15% per run through partitioning and broadcast joins
- **Scaled energy-export reporting from 1 to 4 platforms using partitioned Apache Iceberg tables** and automated data quality checks in Airflow, enabling consistent and trusted metrics across platforms

Qualcomm, Inc | *Data Analyst Intern (MSBA Capstone Project)* | *San Diego, USA* Apr 2026 - Jun 2026

- **Partnered with Qualcomm's engineering team to forecast Non-Recurring Engineering** costs for RFFE chip programs, applying feature engineering across 198K subledger transactions and training Random Forest and XGBoost models
- **Delivered budget forecasts with scenario-based and what-if analysis** to support material and workforce planning for engineering leadership via interactive Streamlit dashboard

Addepar, Inc | *Data Engineer* | *Pune, India* Dec 2023 - May 2025

- **Led onboarding for 8+ enterprise clients managing $500M+ in assets by building ETL pipelines** for trade, position, and cash data, cutting onboarding time by 25%
- **Standardized multi-custodian portfolio data** by building Python-based transformation workflows in Azure Databricks, eliminating 90+ hours of monthly manual review and delivering analysis-ready data models
- **Built validation checks in Python and SQL and conducted root cause analysis** to flag and prioritize high-risk pricing and performance discrepancies by materiality, achieving 98% accuracy and preventing reporting errors across portfolios

Fiserv, Inc | *Data Engineer* | *Pune, India* Jul 2021 - Dec 2023

- **Delivered 5 enterprise data transformation programs** with zero data loss, migrating $2B+ in deposit and loan data via SSIS and SQL Server across full platform conversions
- **Developed 90+ optimized T-SQL procedures to transform and analyze** high-volume transactional and ledger data, resolving bottlenecks to cut batch time from 5 to 3 hours per cycle
- **Identified reconciliation gaps through SQL data profiling and built single source-of-truth data model** for financial data, reducing manual reconciliation effort from 110+ to 15 hours per bank
- **Collaborated with business stakeholders** to translate regulatory, operational, and product requirements into ETL workflows, relational data models, and schemas, ensuring compliance and system integrity during migrations

ACADEMIC PROJECTS

AI-Powered Employee Onboarding Agent | *Python, ChromaDB, RAG, LLM APIs* | *GitHub* Jun 2026

- **Built agentic AI onboarding platform across 12 structured stages**, integrating RAG-based knowledge retrieval, LLM API orchestration, and human-in-the-loop approval workflows
- **Designed self-improving ChromaDB vector store for personalized training paths and mentor matching**, validated with 153 automated tests and DeepEval suite that raised mean output quality from 21.3 to 23.3

Customer Analytics & Targeting – Intuit Case Study | *Python, Regression, LLM-Assisted Development* Feb 2026

- **Built customer targeting model with logistic regression and random forest**, segmenting customers by response likelihood to prioritize highest-value outreach
- **Applied breakeven and ROI analysis to set targeting thresholds**, projecting 18% conversion lift and $410K profit
